IMPORTANT NOTICE...

Canal Closures

The secondary water canals that run through the City receive their water from Utah Lake. The water level of the lake is low, therefore the Canal Companies have been notified to shut down the canals on September 1st due to the drought conditions. Some Canal Companies indicated that they could shut down as early as August 25th, if the drought conditions worsen. Governance of the canals and any decision to shut down the canals are determined solely by the Board of Presidents. South Jordan City is responsible only for the conveyance system and not water supply. For contact information on the canal systems, please see the

SCHOOL ZONE SPEEDS

The South Jordan City Police Department would like to take this opportunity to ask our citizens to remember school zone safety for this school year. South Jordan City is growing rapidly and therefore we have seen a large increase in the number of vehicles on the roadway as well as pedestrian traffic. When combined, these two factors alone create dangerous conditions for the children and crossing guards that use the City roadways and crosswalks. Fortunately, there have been few injury related accidents involving pedestrians and vehicles in South Jordan over the recent years. However, the Police Department views even a single accident as an unfortunate tragedy that most likely could be avoided.

The word "accident", implies something that is unavoidable. When a car crashes into something (i.e., another car, person or building), there are almost always simple actions that the driver could have taken to prevent the accident. Distractions such as cell phones, looking for addresses, passenger conversations, maps, and applying makeup are activities that large numbers of motorists have taken part in while driving. No one intends to have an "accident". However, proper respect for vehicle speeds, distances, unpredictable child behavior and road conditions **MUST** be given while driving to keep everyone safe.

The South Jordan City Police Department receives regular complaints about speeders in school zones and residential areas. Speeding in any area is dangerous, but the danger is increased substantially in highly populated areas. We ask for your support in keeping all pedestrians safe in school zones by slowing to 20 M.P.H. BEFORE reaching the designated flashing school zone signs, and then maintaining the 20 M.P.H. throughout the entire zone. We encourage anyone with any traffic related questions to contact any member of the Police Department for information or solutions.
